MIGUEL SOLER REVERT

SENIOR FRONTEND ENGINEER

ANGULAR · TYPESCRIPT · AI-ASSISTED DEVELOPMENT

Hands-on frontend engineer with 16+ years of experience building and modernising web applications. Currently developing an Angular SSR platform spanning 100+ branded applications in an Nx monorepo. Combine frontend engineering with AI coding agents, browser automation and reusable workflows to investigate issues, implement features and validate changes.

EXPERIENCE

Lead Frontend Engineer | usheru 10/2024 - Present

- Develop Angular applications and shared libraries in an Nx monorepo supporting 100+ branded entertainment applications.
- Build reusable UI components and configurable features for branded catalogues, showtimes and custom pages.
- Implement framework upgrades and improvements to SSR, hydration and frontend performance.
- Use Codex and AI coding agents for codebase investigation, implementation, refactoring and production debugging, supported by code review and browser verification.
- Designed and built an AI-assisted bug-fixing workflow that gathers application context, reproduces issues with Playwright, validates targeted fixes and prepares pull requests for human review.
- Create reusable agent skills and workflows that capture project conventions, guide implementation and standardise verification across applications.
- Contribute architectural decisions and code reviews alongside hands-on implementation.

Senior Frontend Engineer | SuprNation 09/2020 - 10/2024

Modernised multi-brand gaming frontends through Nx migration, UX and performance improvements, shared design foundations and optimised Jenkins delivery pipelines.
